Conference & Showcase 2017

**May 19, 2017 - Serena Hotel, Islamabad**

## About Event:

Pakistan premier Magazine "ENERGY Update" organizing The 9th Annual POWERGEN Conference & Showcase 2017 on **May 19, 2017 - Serena Hotel Islamabad.**

The 9th Annual POWERGEN 2017 Islamabad will be focusing on four key future energy mix i.e. Coal, Nuclear, Hydro and Renewal. The experts will deliver the presentations on ground realities and hurdles being faced in erecting the new Power Plants and Cost of Connecting in National Grid for short-medium and long-term Power Sustainability.

The future of power generations under CPEC – 'an early harvesting by 2018' in Pakistan's Power Industry will also be preciously discussed for the benefits of Conference Delegates. Further, the Islamabad's ambitious aim will also be highlighted for generating a projected total of 23,700MW by 2030.

## Industry Overview:

Realizing the importance of energy, the government is making all efforts to achieve the long-term vision of the power sector to overcome its challenges. The development of indigenous energy resources, such as coal, hydro, alternative and renewable sources, is critical for sustainable economic growth, as envisaged in the Vision 2025. The government is attracting foreign companies to undertake new exploration and production activities by giving attractive incentives. Further, the government is also engaged in making coordination with development partners to support energy related projects.

The China-Pakistan Economic Corridor (CPEC) is expected to add 10,400 MW to the grid by the year 2018. The projects include coal, hydro and wind. It will also significantly change the energy mix, replacing expensive oil and resulting in reduction of the average cost of generation. It is believed that with sincere efforts of the government, it will be possible to build a power generation capacity that can meet Pakistan's energy needs in a sustainable manner.

During July-March FY 2016, the installed capacity in the PEPCO system remained 23,101 MW compared to 23,212 MW during the corresponding period last year with hydro 7,027 MW, thermal 15,324 MW, and nuclear 750 MW. During the period under discussion, electricity generation through thermal remained 45,252 Gwh compared to 43,611 Gwh growth of 4 percent while electricity generation through hydel remained 24,544 23,478 Gwh last year posting a growth of 5 percent. Thus in total there was an increase of 2 percent in electricity generation.

# 9th Annual Power Gen

Conference & Showcase 2017

May 19, 2017 - Serena Hotel, Islamabad

## CONFERENCE

Moreover, the Conference will make a resolution based on following key points by the expert panelists

- **Point to Ponder:** Where the future lies of Energy in Pakistan..?
- **Investment Atmosphere:** CPEC/Foreign Investments vs Local Agenda
- **Resources:** Relying on local or foreign energy for environment friendly generation
- **Financial Challenges:** Historical raised in Circular Debt and Subsidy to IPPs
- **Sustainability:** Trained Workforce and Nationalization
- **Roadmap:** Transparency, employment for prosper industry of Pakistan
- **Challenges:** Empowerment of Ministries vs Regulatory Losses. Performances of DISCOS, PPIB & Provinces in overcoming and supplying uninterrupted power to the nation
- **Burden:** Consumers Accessibility and Cost-of-Power; under new Smart Metering System

The 9th Annual POWERGEN 2017 Islamabad will give promising opportunities to local and international vendoring companies & suppliers, investors and government alike; in learning about latest Technology Tools, Power Products, and Smart Services to be offered by "the Exhibitors (and Service Providers)" at the annual show.

Thus, the Participants of the POWERGEN-2017 will have enormous learning and networking opportunities for making or aligning their strategies for successful ventures.

Registration Fees:

Rs. 15,000/- for one person

10% Discount for a group of 5 & above

8th Annual PowerGen 2016

For registration, branding/ sponsorship & other details:

Engr. Nadeem Ashraf  
Cell: 0304-3098328

W. John Richard
